# SUBJECT INDEX

1981, Volume 15

## A

- Acetylcholinesterase containing nerve fibres in coronary circulation, 171
- N-acetylprocainamide induced changes in refractoriness and monophasic action potentials, dog heart, *in situ*, 159
- Action potentials, transmembrane, and electrocardiogram, renal hypertension, rat, 611
- ACTIVITIES AND ANNOUNCEMENTS, 120
- Adenosine infusion, prolonged, time-dependent response of coronary flow, doubling of peak reactive hyperaemic flow, 282
- use of hexobendine to identify, 599
- Adrenergic nerves in myocardial ischaemia, 680
- Adrenergic stimulation and prostacyclin and thromboxane A<sub>2</sub> formation, 287
- Adrenoreceptors and noradrenaline response in cardiomyopathic hamsters, 296
- stimulation, frog heart, by epinine, electrophysiological and mechanical studies, 700
- Alindine, effects on sinus node activity, and a possible anion antagonist, 335
- 4-Aminopyridine, TEA, Cs and Mg, effects on cardiac slow responses, guinea-pig, 468
- Angiotensin-induced myocardial necrosis and renal failure, rabbit, 43
- Anion antagonist, activity of alindine, 335
- Aorta, thoracic, uptake of radioactive gases, rabbit, 456
- Aortic coarctation, cardiac energetics in short and long term hypertrophy induced by, 623
- valve, natural, tissue and cell renewal, autoradiography, rat, 181
- valvular insufficiency, regional MVO<sub>2</sub>, dog, 305
- Aprindine after left anterior descending coronary artery, 80
- Arrhythmias, effect of hypokalaemia, 98
- Arterial-myocardial sensitivity to verapamil, species variation, 398
- Arterio-venous shunt, moderate, effect on regional extraction, blood flow and oxygen consumption, dog heart, 206
- Atrial action potential and cardiac metabolism, man, 320
- AUTHORS' INSTRUCTIONS, 1
- Autonomic nervous system stimulation, influence on protective zone, 92

## B

- Baroreflex responsiveness in borderline hypertensives, effects of neostigmine, 436
- Beta-adrenergic blockade and direct reduction of myocardial oxygen consumption, 254
- — — effect on triiodothyroacetic acid (triac)-induced cardiac muscle abnormalities, 196
- — — long-term, prolonged protective action on ischaemic myocardium, 462
- — — see also specific drugs
- Beta-adrenoceptor binding in anterior and inferior myocardial wall microsomes of normal canine left ventricle, 239
- Beta-aminopropionitrile, effect on static elastic properties and blood pressure of spontaneously hypertensive rats, 373
- Blood flow and volumic flow of brachial artery, pulsed Doppler determination, man, 164
- distribution, myocardial, effect of timolol, during acute regional ischaemia, cats, 430

- muscle, during dynamic exercise, cadmium telluride detector system assessment for measurement: Instruments and techniques, 731
- volume in the foot, *in vivo* determination using mercury strain gauge and I-131 labelled serum albumin, 262

## BOOK REVIEWS:

- ANDERSON R H and BECKER A E *editors* Cardiac anatomy, and integrated text and colour atlas, 59
- BERENSON G S Cardiovascular risk factors in children, 547
- CHUNG E K Electrocardiography, practical applications with vectoral principles, 547
- CIBA FOUNDATION SYMPOSIUM 71 Blood cells and vessel wall: functional interactions, 120
- DARDIK H *editor* Graft materials in vascular surgery, 59
- DREYFUS L S and BREST A N *editors* Clinical application of cardiovascular drugs, 59
- GLASSER S P and CLARK P J The clinical approach to exercise testing, 548
- HILLS L D, ORMAND J E and WILLERSON J T Manual of clinical problems in cardiology, 547
- KEATINGE W R and HARMAN M C Local mechanisms controlling blood vessels, 548
- SHINEBOURNE E A and ANDERSON R H Current paediatric cardiology, 59
- Brachial artery, diameter, blood flow, velocity and volumic flow, pulsed Doppler determination man, 164
- Bromocriptine, reduction in vulnerability to ventricular fibrillation by, 175

## C

- Cadmium telluride detector system, assessment for measurement of muscle blood flow during dynamic exercise, man: Instruments and techniques, 731
- Calcium exchange and mechanical function, effects of ischaemia and reperfusion, isolated rabbit myocardium, 121
- Cardiac energetics in short and long term hypertrophy induced by aortic coarctation, 623
- output in exercising dogs, control using different types of workload, 151
- slow responses, effects of TEA, Cs, 4-AP and Mg on, papillary muscle, guinea-pig, 468
- Cardiomyopathy, cellular electrical activity, 643
- congestive, model, early alterations in function of sarcoplasmic reticulum in, 276
- noradrenaline response and adrenoreceptors, hamsters, 296
- Cardiopulmonary blood volume in stroke volume ratio, index of cardiac function in animals and man, 580
- Cardiotoxic factor in serum and blast cell extract of patients with acute myeloid leukaemia, 365
- Catecholamine levels, effect of iron deficiency anaemia, 313
- responses to coronary constriction and propranolol, 29
- Cathepsin D, double antibody radioimmunoassay, 68
- Catheter, impedance, stroke volume from intraventricular dimensions obtained with, 328
- Cell and tissue renewal in natural aortic valve, autoradiography, rat, 181
- Cellular electrophysiological changes in round heart disease, 643
- Cesium, TEA, 4-AP and Mg, effects on cardiac slow responses, guinea-pig, 468

- Cholinergic nerves in coronaries, 171  
 Circulatory models for enzyme kinetics, dog, 35  
 — studies of external cardiac assist by counterpulsation, 443  
 Collateral artery vasoconstriction induced by "head-up tilt" in patients with occlusive arterial disease of legs, 675  
 — blood flow and ischaemic bed size, effect of coronary occlusion site, dogs, 668  
 Congenital heart disease, determinants of systemic vascular resistance in children, 245  
 Contractility of isolated cardiac muscle, ultrastructural investigation into size dependency, 21  
 — isovolumetric indices, estimation of maximum left ventricular inotropic response from changes in, 382  
 Coronary artery ligation, depletion of creatine kinase, lactate dehydrogenase, myoglobin and  $K^+$  after, dog, 529  
 — occlusion site, effect on ischaemic bed size and collateral blood flow, dogs, 668  
 Counterpulsation, external cardiac assist by, circulatory model studies, 443  
 Creatine kinase, lactate dehydrogenase, myoglobin and  $K^+$ , myocardial depletion of, in coronary artery ligation, dog, 529  
 Cyclic AMP, myocardial and vulnerability to ventricular fibrillation after coronary artery ligation in isolated rat heart, 690  
 Cytochrome spectra and myoglobin oxygenation, isolated beating heart, 86

## D

- Deoxygenated perfusion, coronary reactive hyperaemia after, 615  
 Digitalis-induced inotropy, effect of hypokalaemia, 98  
 Digoxin uptake, myocardial, effects of hypoxia on and on levels of plasma catecholamine dog, 421

## E

- Electrical activity of human atrial myocardium and cardiac metabolism, 320  
 Electrocardiogram and transmembrane action potentials, renal hypertension, rat, 611  
 Electrocardiographic activity, abnormal, after experimental myocardial infarction, isolated heart, rat, 144  
 Endothelial cells, cardiac, selective bacterial adherence in tissue culture, 404  
 Energetics, cardiac, in short and long term hypertrophy induced by aortic coarctation, 623  
 Enzymes, cardiac, selection of suitable circulatory model for plasma clearance and distribution, dog, 35  
 Epinephrine, frog heart adrenoceptor stimulation by, 700  
 Ethanol, effect on electrogram changes and regional myocardial blood flow during acute myocardial ischaemia, 47  
 Excitation-contraction coupling system of hypothermic myocardium following ischaemia and reperfusion, 390  
 External cardiac assist by counterpulsation, circulatory model studies, 443  
 Extra-uterine life, adaptation of pulmonary circulation to, in the pig, relevance to human infant, 108

## F

- Foot, blood volume determination using mercury strain gauge and I-131 labelled serum albumin, 262

## G

- Glucose-insulin-potassium infusions, effect on epicardial ECG changes and on myocardial metabolic changes after coronary artery ligation, dogs, 588

## H

- Heart morphology, effect of iron deficiency anaemia, 313  
 — rate, action of prostacyclin, dog, 538  
 Hexobendine, use to examine whether coronary vasodilator metabolite released from guinea-pig isolated hearts is adenosine, 599  
 Hyaluronidase, effects of evolution of epicardial R wave voltage following experimental coronary artery occlusion, 425  
 Hyperaemia, reactive, after brief occlusion and after deoxygenated perfusion, 615  
 — peak, rapid and slow response to intracoronary adenosine infusion, 282  
 Hypertension, borderline, baroreflex responsiveness, effects of neostigmine, human, 436  
 — renal, transmembrane action potentials and electrocardiogram, rat, 611  
 — renovascular, mechanics, circulatory and renin responses in man to unilateral reduction of renal perfusion pressure, 637  
 Hypertrophy, short and long term, induced by aortic coarctation, cardiac energetics 623  
 Hypokalaemia, effect on digitalis-induced inotropy and arrhythmias, 98  
 Hypoperfusion lung, clinical implications, and left pulmonary artery ligation at birth, pig, 214  
 Hypoxia, effects on myocardial digoxin uptake and levels of plasma catecholamines, dog, 421

## I

- Impulse propagation in normal and stenosed vessels, 190  
 Infarct size, myocardial, effects of propranolol, with and without coronary artery reperfusion, dog, 411  
 — reduction by pyruvate, biochemical mechanism, 652  
 Inosine as selective inotropic agent on ischaemic myocardium, 659  
 Inotropy, digitalis-induced, effect of hypokalaemia, 98  
 Inotropic action of inosine, 659  
 INSTRUMENTS AND TECHNIQUES: Assessment of cadmium telluride detector system for measurement of muscle blood flow during dynamic exercise in man, 731  
 Iron deficiency anemia, effect on catecholamine levels and heart morphology, 313  
 Ischaemia, effect on adrenergic neurons of rat heart, 680  
 — bed size and collateral blood flow, effect of coronary occlusion site, dogs, 668  
 — heart disease, assessment of myocardial performance in, isoprenaline infusion, 351  
 — myocardial, effect of long-term beta-blockade, 462  
 — inosine as a selective inotropic agent on, 659  
 — and reperfusion, effect on calcium exchange and mechanical function in isolated rabbit myocardium, 121  
 — hypothermia and subcellular function, 390  
 Isolated cardiac myocytes, I. Preparation of adult myocytes and their homology with the intact tissue: review, 483, II. Functional aspects of mature cells: review, 549  
 Isoprenaline infusion, graded-dose, in assessment of myocardial performance in ischaemic heart disease, 351

## L

- Lactate dehydrogenase, creatine kinase, myoglobin and  $K^+$ , myocardial depletion of, in coronary artery ligation, dog, 529  
 Left ventricular inotropic responses, estimation from changes in isovolumic indices of contractility, dog, 382  
 — volume overload, myocardial blood flow and mechanics, dog, 522  
 Leukaemia, acute myeloid, cardiotoxic factor in serum and blast cell extract of, 365  
 Lung perfusion following left pulmonary artery ligation at birth, clinical implications for hypoperfused lung, pig, 214

## M

- Magnesium, Cs, TEA, and 4-AP, effects on cardiac slow responses, guinea-pig, 468
- salt of adenosine triphosphate ( $\text{MgATP}^{2-}$ ) versus intracellular pH, relative importance of  $\text{Ca}^{2+}$ -activated force generation of disrupted rabbit cardiac cells, 268
- Melperone, electrophysiological effects, dog heart, *in situ*: 131: influence of beta-adrenergic and cholinergic blockade, 137
- haemodynamic and metabolic effects during acute left ventricular failure, dogs, 724
- Metabolism, cardiac, and electrical activity of human atrial myocardium, 320
- Microsomes, myocardial wall, of normal canine left ventricle, differences in beta-adrenoceptor binding, 239
- Microsphere study of acute pulmonary venous occlusion, rat 233
- Mitochondrial aspartate aminotransferase from anoxic rat heart cell cultures during reoxygenation, comparison, after myocardial infarction and after cardiac surgery, 11
- Monophasic action potentials, effect of N-acetylprocainamide, dog heart, *in situ*, 159
- MVO<sub>2</sub>, regional, in aortic valvular insufficiency, dog, 305
- Myocardial blood flow and mechanics in overload-induced left ventricular hypertrophy, dogs, 522
- contractile force at high arterial oxygen tension, dog, 227
- infarction, experimental, abnormal ECG activity after, 'isolated' rat heart, 144
- intensity, indices, 529
- necrosis, angiotensin-induced, and renal failure, rabbit, 43
- oxygen consumption, does beta-blockade directly reduce? 254
- performance, assessment in ischaemic heart disease, isoprenaline infusion, 351
- tissue flow, unchanged, following pericardiotomy in acutely loaded cat hearts, 74
- wall microsomes of normal canine left ventricle differences in beta-adrenoceptor binding, 239
- see also Ischaemic myocardium
- Myocytes, cardiac, isolated, I. Preparation of adult myocytes and their homology with the intact tissue: review, 483: II. Functional aspects of mature cells: review, 549
- Myoglobin, lactate dehydrogenase, creatine kinase and  $\text{K}^+$ , myocardial depletion of, in coronary artery ligation, dog, 529
- oxygenation, and cytochrome spectra of isolated beating heart, 86

## N

- Neostigmine, effect on baroreflex responsiveness in borderline hypertension, 436
- Nitrogen, radioactive, uptake by rabbit thoracic aorta, 456
- Noradrenaline levels, effect of iron deficiency anaemia, 313
- response in cardiomyopathic hamsters, possible relation to changes in adrenoceptors studied by radioligand binding, 296

## O

- Occlusive arterial disease of the legs, collateral artery vasoconstriction induced by 'head-up tilt' in patients with, 675
- Overload-induced left ventricular hypertrophy, myocardial blood flow and mechanics, dog, 522
- Overloading, cardiac, systolic and diastolic, protein synthesis during, comparative study, rats, 515
- Oxygen consumption, regional, in arterio-venous shunt, dog, 206
- radioactive, uptake by rabbit thoracic aorta, 456
- tension, arterial, high, myocardial contractile force, dog, 227

## P

- Pacemaker selectivity, influence on rabbit atria of ionic environment, and of alinidine, a possible anion antagonist, 335
- Pericardiotomy, unchanged myocardial tissue perfusion following, acutely loaded cat hearts, 74
- pH, intracellular, versus  $\text{MgATP}^{2-}$  concentration, effects on cardiac fibre force, 268
- Potassium, creatine kinase, lactate dehydrogenase and myoglobin, myocardial depletion of, in coronary artery ligation, dog, 529
- depletion, chronic, effect on digitalis-induced inotropy and arrhythmias, 98
- Pressure-overload cardiac energetics, 623
- Procaine block, intrapericardial, of vagal afferents, cats, 61
- Propranolol and atenolol, influence on myocardial cyclic AMP, high energy phosphates and vulnerability to fibrillation after coronary artery ligation, 690
- catecholamine responses to coronary constriction, anaesthetised dog, 28
- effects on myocardial infarct size with or without coronary artery reperfusion, dog, 411
- Prostacyclin ( $\text{PGI}_2$ ) and thromboxane  $\text{A}_2$  formation in response to adrenergic stimulation in humans, 287
- vagal reflex actions, dog, 538
- Protective zone, influence of autonomic nervous system stimulation, 92
- Protein synthesis during systolic and diastolic cardiac overload in rats: comparative study, 515
- Pulmonary circulation, adaptation in extra-uterine life in the pig, relevance to human infant, 108
- and loss of microspheres from lung following acute pulmonary venous occlusion, 233
- venous occlusion, acute, microsphere study, rat, 233
- Pulsed Doppler velocimeter in determination of diameter, blood flow, velocity and volumic flow of brachial artery, man, 164
- Pyruvate in reduction of infarct size, biochemical mechanism, 652

## R

- R wave voltage, epicardial, evolution following experimental coronary artery occlusion, effect of hyaluronidase, 425
- Radioactive gases uptake by rabbit thoracic aorta, 456
- Reactive hyperaemia, coronary, after brief occlusion and after deoxygenated perfusion, 615
- Refractoriness, effect of N-acetylprocainamide, dog heart, *in situ*, 159
- Relaxation of tetanised smooth muscle of canine saphenous vein, 632
- Renal failure and angiotensin-induced myocardial necrosis, rabbit, 43
- hypertension, transmembrane action potentials and electrocardiogram, rat, 611
- perfusion pressure, circulatory and renin responses to unilateral reduction, 637
- see also Hypertension
- Round heart disease of turkeys, cellular electrophysiological changes, potential basis for dysrhythmias in myopathic ventricles, 643

## S

- Saphenous vein smooth muscle, tetanised, relaxation, canine, 632
- Sarcoplasmic reticulum, early alterations in functions, naturally occurring model of congestive cardiomyopathy, 276
- Selective bacterial adherence to cardiac endothelial cells in tissue culture, 404

Shortening fraction, dependence on Starling mechanism, 475  
Smooth muscle of canine saphenous vein, relaxation, 632  
Spontaneously hypertensive rats, effect of beta-aminopropionitrile on the static elastic properties and blood pressure, 373  
Starling mechanism, dependence of shortening fraction on, 475  
Stroke volume from intraventricular dimensions obtained with impedance catheter, 328

## T

Tetraethylammonium, 4-AP, Cs and Mg, effects on cardiac slow responses, guinea-pig, 468  
Thromboxane A<sub>2</sub> and prostacyclin formation in response to adrenergic stimulation in humans, 287  
Timolol effect on myocardial blood flow distribution during acute regional ischaemia, cats, 430  
Tissue and cell renewal in natural aortic valve, autoradiography, rat, 181

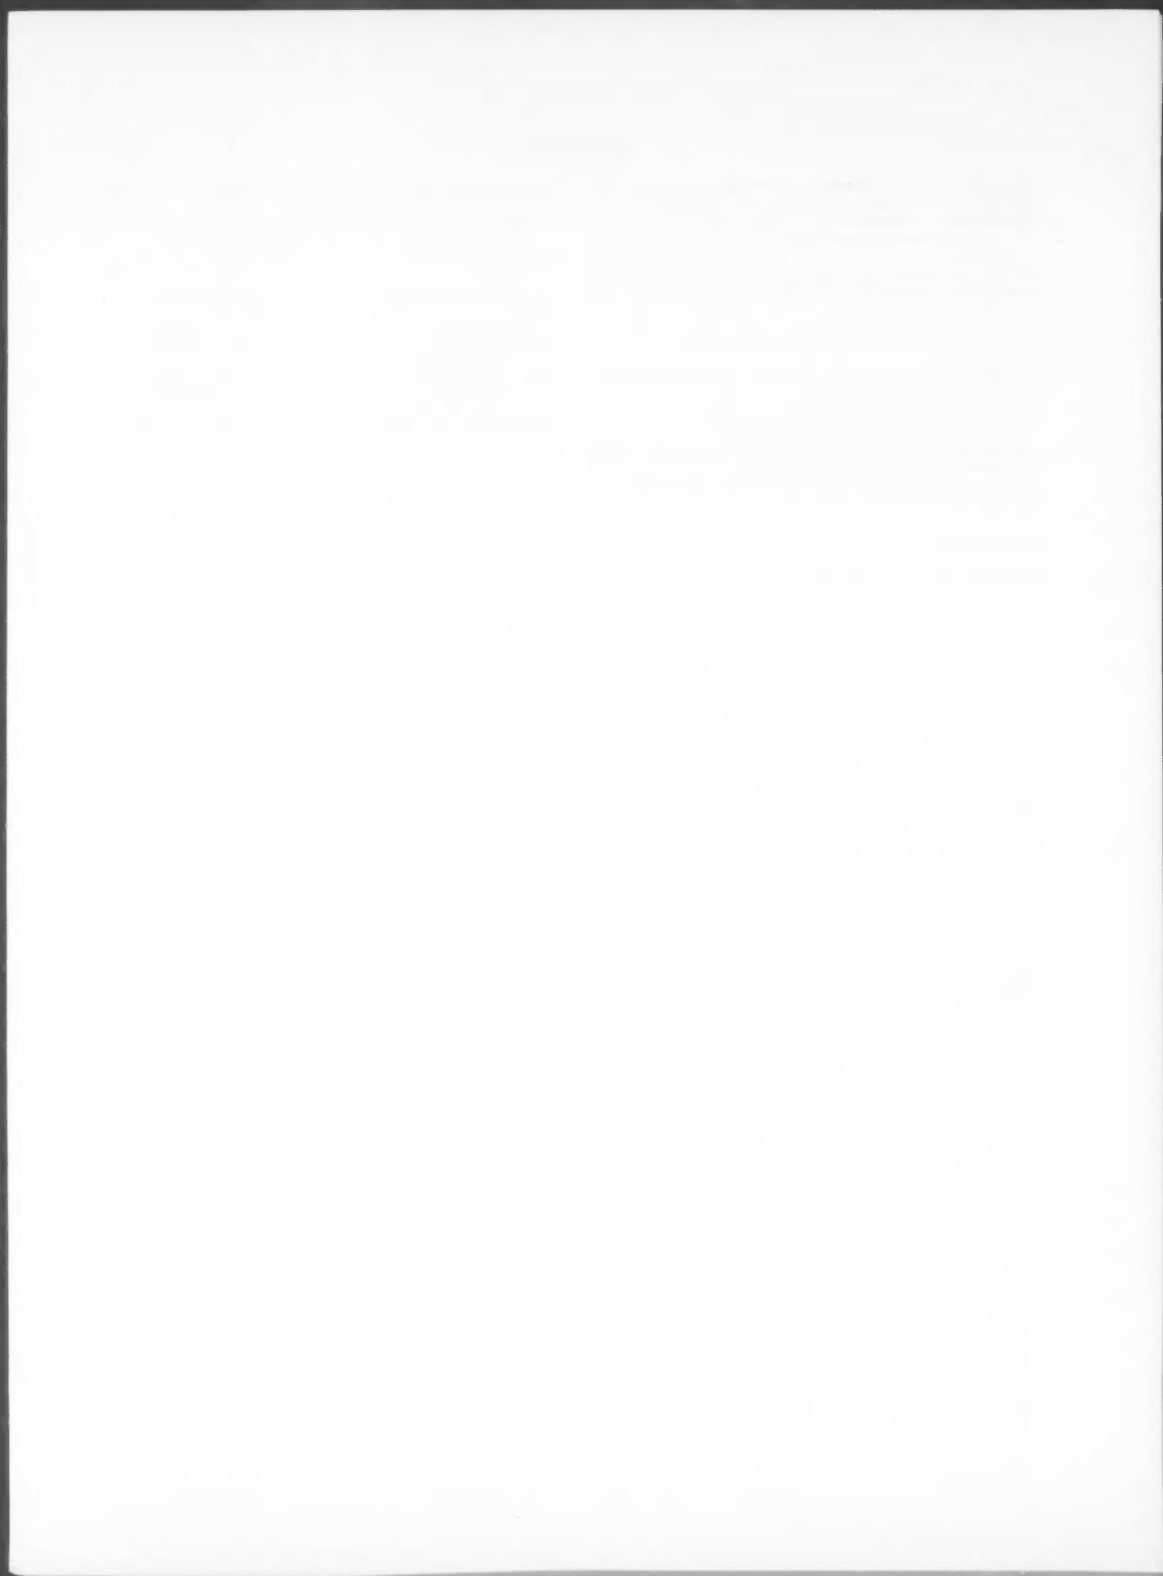

Transmembrane action potentials and the electrocardiogram in rats with renal hypertension, 611  
Triiodothyroacetic acid (triac)-induced cardiac muscle abnormalities, effect of beta adrenergic blockade, 196

## V

Vagal afferents, intrapericardial procaine block, reversible, cats, 61  
Vascular resistance, systemic, determinants, children with congenital heart disease, 245  
Ventricular fibrillation, effect of bromocriptine on, 175  
— — vulnerability to, and myocardial cyclic AMP, 690  
— see also Left ventricular  
Verapamil, species variation in arterial-myocardial sensitivity to, 398

## X

Xenon, radioactive, uptake by rabbit thoracic aorta, 456

# CONTENTS

*No 1 JANUARY 1981*

<b>Instructions to Authors</b>	1
<b>Enhanced release of mitochondrial aspartate aminotransferase (mAST) from anoxic rat heart cell cultures during reoxygenation. Comparison to plasma mAST levels in patients after acute myocardial infarction and after cardiac surgery:</b> A van der Laarse, H A Davids, L Hollaar, and W Th Hermens	11
<b>An ultrastructural investigation into the size dependency of contractility of isolated cardiac muscle:</b> Leanne M Delbridge and Denis S Loiselle	21
<b>Myocardial and peripheral catecholamine responses to acute coronary artery constriction before and after propranolol treatment in the anaesthetised dog:</b> B P McGrath, S P Lim, L Leversha, and A Shanahan	28
<b>Selection of a suitable circulatory model for the plasma clearance and distribution of cardiac enzymes in the dog</b> Marja P Visser, Marijke T A Krill, George M Willems, and Wim Th Hermens	35
<b>Angiotensin-induced myocardial necrosis and renal failure in the rabbit: distribution of lesions and severity in relation to plasma angiotensin II concentration and arterial pressure:</b> D Kremer, G Lindop, W C B Brown, J J Morton, and J I S Robertson	43
<b>Effect of ethanol on electrogram changes and regional myocardial blood flow during acute myocardial ischaemia:</b> Robert F Gilmour Jr, Rodolphe Ruffy, D Eugene Lovelace, Thomas M Mueller, and Douglas P Zipes	47
<b>Book Reviews</b>	59

*No 2 FEBRUARY 1981*

<b>Reversible blockade of myelinated and non-myelinated cardiac afferents in cats by instillation of procaine into the pericardium:</b> Joachim O Arndt, Ulrich Pasch, Leonid F Samodelov, and Heike Wiebe	61
<b>A double antibody radioimmunoassay for canine cardiac cathepsin D:</b> Allen M Samarel, Edward A Ogunro, Alan G Ferguson, and Michael Lesch	68
<b>Unchanged myocardial tissue perfusion following pericardiotomy in acutely loaded cat hearts:</b> Jon Lekven	74
<b>Alterations in regional myocardial distribution and arrhythmogenic effects of aprindine produced by coronary artery occlusion in the dog:</b> Stanley Nattel, Donal H Pedersen, and Douglas P Zipes	80
<b>Reflectance spectrophotometric monitoring of the isolated perfused heart as a method of measuring the oxidation-reduction state of cytochromes and oxygenation of myoglobin:</b> I E Hassinen, J K Hiltunen, and T E S Takala	86
<b>Influence of autonomic nervous system stimulation on the protective zone:</b> Wesley W Brooks, Richard L Verrier, and Bernard Lown	92
<b>Effect of chronic potassium depletion on digitalis-induced inotropy and arrhythmias:</b> Roger J Hall, Alex Gelbart, Margaret Billingham, George Snidow, and Robert H Goldman	98
<b>Adaptation of the pulmonary circulation to extra-uterine life in the pig and its relevance to the human infant:</b> Sheila G Haworth and Alison A Hislop	108
<b>Book Review and Activities</b>	120

### No 3 MARCH 1981

<b>Effects of ischaemia and reperfusion on calcium exchange and mechanical function in isolated rabbit myocardium:</b> Patrick D V Bourdillon and Philip A Poole-Wilson	121
<b>Electrophysiological effects of melperone in the dog heart <i>in situ</i> — a new antiarrhythmic drug:</b> Helge Refsum, Jan P Amlie, Eivind S Platou, Torbjørn Owren, and Knud Landmark	131
<b>Influence of beta-adrenergic and cholinergic blockade on the electrophysiological effects of melperone in the dog heart <i>in situ</i>:</b> Eivind S Platou, Helge Refsum, Jan P Amlie, and Knud Landmark	137
<b>Abnormal electrocardiographic activity revealed by isolated rat heart preparations at various times after experimental myocardial infarction:</b> H A Sahyoun and R Hicks	144
<b>Control of cardiac output in exercising dogs using different types of workload:</b> P G A Versteeg, S B Sampurno, P Sipkema, and G Elzinga	151
<b>N-acetylprocainamide induced changes in refractoriness and monophasic action potentials of the dog heart <i>in situ</i>:</b> Jan P Amlie and Knud Landmark	159
<b>Pulsed Doppler: determination of diameter, blood flow velocity, and volumic flow of brachial artery in man:</b> J A Levenson, P A Peronneau, A Simon, and M E Safar	164
<b>Acetylcholinesterase containing nerve fibres in coronary circulation:</b> Francesco Amenta, Fabio Ferrante, and Carlo Cavallotti	171
<b>Reduction in vulnerability to ventricular fibrillation by bromocriptine, a dopamine agonist:</b> Rodney H Falk, Regis D DeSilva, and Bernard Lown	175

### No 4 APRIL 1981

<b>Tissue and cell renewal in the natural aortic valve of rats: an autoradiographic study:</b> Peter J Schneider and J David Deck	181
<b>Impulse propagation in normal and stenosed vessels:</b> David L Newman, Stephen E Greenwald, and Howard T Denyer	190
<b>Production of cardiac muscle abnormalities in offspring of rats receiving triiodothyroacetic acid (triac) and the effect of beta adrenergic blockade:</b> Christine M Hawkey, Eckhardt G J Olsen, and Cecil Symons	196
<b>Effect of moderate arterio-venous shunt on regional extraction, blood flow and oxygen consumption in the dog heart:</b> Kay L Briden and Harvey R Weiss	206
<b>How the left lung is perfused after ligating the left pulmonary artery in the pig at birth: clinical implications for the hypoperfused lung:</b> S G Haworth, M de Leval, and F J Macartney	214
<b>Myocardial contractile force at high coronary arterial oxygen tension in dogs:</b> Kinji Ishikawa, Ken Kanamasa, Tetsu Yamakado, Yasuyuki Kohashi, Shohei Otani, Takeo Hayashi, and Ryo Katori	227
<b>Pulmonary circulation and loss of microspheres from the lung following acute pulmonary venous occlusion:</b> Knut S Andersen and Leidulf Segadal	233
<b>Differences in beta-adrenoceptor binding in anterior and inferior myocardial wall microsomes of normal canine left ventricle:</b> Michael H Burnam, Dhun H Sethna, Daniel M Rose, Craig S Stern, and William E Shell	239

No 5 MAY 1981

<b>Determinants of systemic vascular resistance in children with congenital heart disease:</b> Geoffrey W Morrison and Fergus J Macartney . . . . .	245
<b>Does beta-blockade directly reduce myocardial oxygen consumption?:</b> Michael Thomas, Ivor T Gabe, Helen Kimber, Christopher J Mills, and Trevor J Sweeting .	254
<b>The <i>in vivo</i> determination of the blood volume in the foot using a mercury strain gauge plethysmograph and I-131 labelled serum albumin:</b> Luc Colemont and Philippe Decoutere . . . . .	262
<b>Intracellular pH vs MgATP<sup>2-</sup> concentration: relative importance as determinants of Ca<sup>2+</sup>-activated force generation of disrupted rabbit cardiac cells:</b> S K B Donaldson, E Bond, L Seeger, N Niles, and L Bolles . . . . .	268
<b>Early alterations in the function of sarcoplasmic reticulum in a naturally occurring model of congestive cardiomyopathy:</b> Nancy A Staley, George R Noren, and Stanley Einzig . . . . .	276
<b>Time-dependent response of coronary flow to prolonged adenosine infusion: doubling of peak reactive hyperaemic flow:</b> Antonio L'Abbate, Paolo Camici, Maria G Trivella, Gualtiero Pelosi, Graham J Davies, Anna M Ballestra, and Luigi Taddei . . . . .	282
<b>Prostacyclin and thromboxane A<sub>2</sub> formation in response to adrenergic stimulation in humans: a mechanism for local control of vascular response to sympathetic activation?:</b> Gian G Neri Serneri, Giulio Masotti, Gian F Gensini, Loredana Poggesi, Rosanna Abbate, and Massimo Mannelli . . . . .	287
<b>Enhanced noradrenaline response in cardiomyopathic hamsters: possible relation to changes in adrenoceptors studied by radioligand binding:</b> Joel S Karliner, Colin Alabaster, Heather Stephens, Peter Barnes, and Colin Dollery . . . . .	296

No 6 JUNE 1981

<b>Regional O<sub>2</sub> consumption in canine left ventricular myocardium in experimental acute aortic valvular insufficiency:</b> J Vinten-Johansen and Harvey R Weiss . .	305
<b>The effect of iron deficiency anemia in the rat on catecholamine levels and heart morphology:</b> Marcos A Rossi, Sonia V Carillo, and J Samuel M Oliveira . . . .	313
<b>Metabolism and the electrical activity of human atrial myocardium:</b> Jochen Senges, Johannes Brachmann, Ioannis Rizos, Rolf Jauernig, Bodo Hasper, Luis Beck, Wolfgang Braun, and Wolfgang Kübler . . . . .	320
<b>Continuous stroke volume and cardiac output from intra-ventricular dimensions obtained with impedance catheter:</b> Jan Baan, Tjong T Aouw Jong, Peter L M Kerkhof, Rudolf J Moene, Arjan D van Dijk, Enno T van der Velde, and Jan Koops .	328
<b>Pacemaker selectivity: influence on rabbit atria of ionic environment and of alinidine, a possible anion antagonist:</b> J S Millar and E M Vaughan Williams . .	335
<b>Assessment of myocardial performance in ischaemic heart disease: from changes in left ventricular power output produced by graded-dose isoprenaline infusion:</b> B G Firth, L B Tan, B Rajagopalan, D L Schultz, and G de J Lee . . . . .	351

*No 7 JULY 1981*

<b>A cardiotoxic factor in serum and blast cell extract of patients with acute myeloid leukaemia:</b> M A Mir	365
<b>Effect of beta-aminopropionitrile on the static elastic properties and blood pressure of spontaneously hypertensive rats:</b> C L Berry, S E Greenwald, and N Menahem	373
<b>Estimation of maximum left ventricular inotropic response from changes in isovolumic indices of contractility in the dog:</b> Archer Broughton and Paul I Korner	382
<b>Characterisation of the excitation-contraction coupling system of the hypothermic myocardium following ischaemia and reperfusion:</b> Michael L Hess, Mark F Warner, Alan D Robbins, Steven Crute, and Lazar J Greenfield	390
<b>Species variation in arterial-myocardial sensitivity to verapamil:</b> Paul Quinn, Martyn G Briscoe, Aidan Nuttall, and Howard J Smith	398
<b>Selective bacterial adherence to cardiac endothelial cells in tissue culture:</b> Lance R Peterson, Akhouri A Sinha, and Robert P Gruninger	404
<b>Effects of propranolol on myocardial infarct size with and without coronary artery reperfusion in the dog:</b> Robert D Reynolds, William E Burmeister, Richard J Gorczyński, Deana D Dickerson, Michael P Mathews, and Robert J Lee	411
<b>Effects of hypoxia on myocardial digoxin uptake and levels of plasma catecholamines in anaesthetised dogs:</b> Kazuto Saito, Tomoyoshi Kashima, Kazuaki Kiyonaga, and Hiromitsu Tanaka	421

*No 8 AUGUST 1981*

<b>Evolution of epicardial R wave voltage following experimental coronary artery occlusion: effects of hyaluronidase:</b> Lair G T Ribeiro, L David Hillis, and Peter R Maroko	425
<b>Effect of timolol on blood flow distribution in the myocardium during acute regional ischaemia in cats:</b> Ketil Grong, Lodve Stangeland, Knut S Andersen, and Jon Lekven	430
<b>Baroreflex responsiveness in borderline hypertensives: a study with neostigmine:</b> Bruno Trimarco, Massimo Volpe, Bruno Ricciardelli, Carlo Vigorito, Luigi Sacca, Franco Rengo, and Mario Condorelli	436
<b>Circulatory model studies of external cardiac assist by counterpulsation:</b> Richard M Lueptow, J Mark Karlen, Roger D Kamm, and Ascher H Shapiro	443
<b>Transport of radioactive oxygen, nitrogen and xenon into the rabbit thoracic aorta <i>in situ</i>:</b> Jane Davis, J Klinowski, and C P Winlove	456
<b>Long-term beta-blockade: prolonged protective action on the ischaemic myocardium:</b> Allan S Manning, Jacinta M Keogh, Michael J Shattock, D John Coltart, and David J Hearse	462
<b>Effect of tetraethylammonium, 4-aminopyridine, cesium and magnesium on slow responses in the guinea pig papillary muscle:</b> M Sebeszta, E Coraboeuf, E Deroubaix, and M le Floch	468
<b>Shortening fraction: its dependence on the Starling mechanism:</b> Alicia R Mattiazzi, Horacio E Cingolani, and Hugo Montenegro	475

*No 9 SEPTEMBER 1981*

<b>REVIEW: Isolated cardiac myocytes: I Preparation of adult myocytes and their homology with the intact tissue:</b> Jocelyn W Dow, Nigel G L Harding, and Trevor Powell . . . . .	483
<b>Protein synthesis during systolic and diastolic cardiac overloading in rats: a comparative study:</b> Jean Marie Moalic, Josiane Bercovici, and Bernard Swyngedauw . . . . .	515
<b>Myocardial blood flow and mechanics in volume overload-induced left ventricular hypertrophy in dogs:</b> Philip B Hultgren and Alfred A Bove . . . . .	522
<b>Depletion of myocardial creatine kinase, lactate dehydrogenase, myoglobin and K<sup>+</sup> after coronary artery ligation in dogs.</b> Roger N Johnson, Neville L Sammel, and Robin M Norris . . . . .	529
<b>Prostacyclin (PGI<sub>2</sub>) lowers heart rate in the conscious dog:</b> Thomas H Hintze, Maret J Panzenbeck, Edward J Messina, and Gabor Kaley . . . . .	538
<b>Book Reviews</b> . . . . .	547

*No 10 OCTOBER 1981*

<b>REVIEW: Isolated cardiac myocytes: II Functional aspects of mature cells:</b> Jocelyn W Dow, Nigel G L Harding, and Trevor Powell. . . . .	549
<b>Ratio of cardiopulmonary blood volume to stroke volume as an index of cardiac function in animals and in man:</b> Jurgens J van der Walt, Johannes M van Rooyen, George D Cilliers, Johannes C J van Ryssen, and Michiel N van Aarde . . . . .	580
<b>Effect of glucose-insulin-potassium infusions on epicardial ECG changes and on myocardial metabolic changes after coronary artery ligation in dogs:</b> A J Dalby, O L Bricknell, and L H Opie . . . . .	588
<b>Use of hexobendine to examine whether the coronary vasodilator metabolite released from guinea-pig isolated hearts is adenosine:</b> Alan L Rothaul and Kenneth J Broadley . . . . .	599

*No 11 NOVEMBER 1981*

<b>Transmembrane action potentials and the electrocardiogram in rats with renal hypertension:</b> Edmund C H Keung and Ronald S Aronson . . . . .	611
<b>Coronary reactive hyperaemia after brief occlusion and after deoxygenated perfusion:</b> Katharine O Kelley and K Lance Gould . . . . .	615
<b>Cardiac energetics in short and long term hypertrophy induced by aortic coarctation:</b> P Coughlin and C L Gibbs . . . . .	623
<b>Relaxation of tetanised smooth muscle of canine saphenous vein:</b> Newman L Stephens, Victor A Claes, and Dirk L Brutsaert . . . . .	632

<b>Circulatory and renin responses in man to unilateral reduction of the renal perfusion pressure:</b> Maurizio D Guazzi, Cesare Fiorentini, Maria T Olivari, Antonio Bartorelli, Fabio Magrini, and Carla Biancardi . . . . .	637
<b>Cellular electrophysiological changes in "round heart disease" of turkeys: a potential basis for dysrhythmias in myopathic ventricles:</b> Stanley Einzig, Barry Lee S Detloff, Barbara K Borgwardt, Nancy A Staley, George R Noren, and David G Benditt . . . . .	643
<b>Biochemical mechanism of infarct size reduction by pyruvate:</b> Vera Regitz, Takayoshi Azumi, Hartmut Stephan, Sigrun Naujocks, and Wolfgang Schaper . . . . .	652
<b>Inosine as a selective inotropic agent on ischaemic myocardium?:</b> Keith V Woollard, Rosalie O Kingaby, Max J Lab, Arthur W G Cole, and T Norman Palmer . . . . .	659
<b>Effect of coronary occlusion site on ischaemic bed size and collateral blood flow in dogs:</b> Keith A Reimer, Raymond E Ideker, and Robert B Jennings . . . . .	668

*No 12 DECEMBER 1981*

<b>Constriction of collateral arteries induced by "head-up tilt" in patients with occlusive arterial disease of the legs:</b> K Agerskov, O Henriksen, K H Tønnesen, and N A Lassen . . . . .	675
<b>Effect of ischaemia on the adrenergic neurons of the rat heart: a fluorescence histochemical and biochemical study:</b> S Holmgren, T Abrahamsson, O Almgren, and B-M Eriksson . . . . .	680
<b>Influence of propranolol isomers and atenolol on myocardial cyclic AMP, high energy phosphates and vulnerability to fibrillation after coronary artery ligation in the isolated rat heart:</b> Wilhelm F Lubbe, Cecilia A Muller, Michael Worthington, E Lynn McFadyen, and Lionel H Opie . . . . .	690
<b>Electrophysiological and mechanical studies of frog heart adrenoceptor stimulation by epinine:</b> H Soustre and A Rakotonirina . . . . .	700
<b>Changes in regional myocardial blood flow and variable development of hypertrophy after aortic banding in puppies:</b> Stanley Einzig, Jack I Leonard, Michael R Tripp, Russell V Lucas, Claude R Swayze, and Irwin J Fox. . . . .	711
<b>Haemodynamic and metabolic effects of the antiarrhythmic drug melperone during acute left ventricular failure in dogs:</b> Otto A Smiseth, Eivind S Platou, Helge Refsum, and Ole D Mjøs . . . . .	724
<i>Instruments and techniques</i>	
<b>Assessment of cadmium telluride detector system for measurement of muscle blood flow during dynamic exercise in man:</b> Raymond S Smith, Jørgen Bojsen, and David J Warren . . . . .	731
